Marchesini Group at “Packology 2010”

Marchesini Group will be attending the first edition of “**Packology**”, a trade show on packaging and processing technologies, that will take place in **Rimini** from **June 8th – 11th** this year. The event has been organized for manufacturers of this industry and will be repeated every three years. It derives from the partnership between **Unione Costruttori Italiani Macchine Automatiche (UCIMA)** and **Rimini Fiera Spa**.

In a stand of **100 m² (Pavillion A3 – Stand 080)**, Marchesini Group will showcase **two versions** of the **labeller model BL400XL**, produced by Neri; the machine works at a speed of **400 cartons per minute** and **applies traceability codes on pharmaceuticals (“track & trace”)** and **labels with various code combinations**.

To confirm the impressive **level of reliability** of the “track & trace” solutions offered by Marchesini Group, labeller BL400 can **accommodate different commercial track and trace systems based on the customer’s requirements**. The Group’s target is indeed that of guaranteeing integration with the main commercial track and trace systems available on the international market; Sytech and Laetus systems will indeed be exhibited.

Spotlights on the **BL400VXL** machine that applies one vignette on the top of the carton and prints Datamatrix codes on an impressive three positions: the labeller avails of a **commercial track and trace system produced in Italy by Sytech**.

The other version of the main machine on show at Marchesini’s stand is **BL400XL**, which fits a **commercial track and trace system by Laetus** for printing and controlling traceability codes of packaged pharmaceuticals.
