### MARCHESINI GROUP AT “PHARMINTECH 2010”

*In a stand of 500 m<sup>2</sup> (Hall 19 - Stand D63), the latest novelties for packaging solid, liquid and cream pharmaceutical products and also for the “track and trace” market will be on show*

High-tech and innovative solutions created for packaging a variety of pharmaceutical products in an appealing **stand of 500 m<sup>2</sup>**. Among the main exhibitors of “**Pharmintech** 2010” – the third edition of the pharmaceutical packaging trade fair to go on scene in Bologna from **May 12th – 14th (Hall 19 - Stand D63)** – will be Marchesini Group, a worldwide leader of the automatic pharmaceutical and cosmetic packaging machine industry. The group will showcase complete lines and stand-alone machines, all cutting edge and able to satisfy every packaging requirement of liquid, solid and cream products.

First and foremost, to prove the Group’s utmost attention to the **topic of pharmaceutical serialization**, there will be four versions of the labeller produced by Neri, **BL400 XL “Track&Trace”**, which applies and controls traceability codes on pharmaceuticals and also labels with various code combinations. Marchesini’s versatility in guaranteeing the possibility to install all product track and trace software on the machine is confirmed by the fact that the group will exhibit **4 machines**, equipped with systems of three different suppliers: **Laetus, Sea Vision** and **Sytech**.

Marchesini’s stand will also host two Neri labellers designed for different products: the **BL400** for syrups and the **BL600** for vials.

As for the solids market, the role leader will be **Integra300, an integrated robotic blister line** that integrates the two thermoforming and carton packaging operations in one single monobloc unit. The line features an integrated robotic connection, **Robocombi**; this solution picks up each individual blister and places it directly in the buckets of the cartoner, without any intermediate steps.

On show will also be the **tube filler for tablets MT1000**, which clearly changes the concept of filling rigid tubes, thanks to its revolutionary filling system. Worth a mention is also machine model **MST200MINI**, a fast, compact and ergonomic **machine that packages solid products in strips**.

For the **creams** market, an area will be dedicated to the **tube filling line**, made up of the **Millennium 120** filler, with its innovative and easy to disassemble dispensing unit, installed in line with the **cartoner MA155**.

To conclude, some interesting news. On **May 12<sup>th</sup>** at 12.20 pm, in the “*Innovation Center*” (Pavillion 22) of the trade fair, Paolo D’Anna, area manager of Marchesini Group, will illustrate **Marchesini’s robotic solutions** applied to the pharmaceutical packaging lines and machines.

On **May 12<sup>th</sup> – 13<sup>th</sup>**, after the trade fair closes, from late afternoon through to 9 pm Marchesini Group will invite its customers for “**sundowners**” at its **Headquarters in Pianoro**: a pleasant and relaxing opportunity for guests also to visit the company.
