### Marchesini Group at “Total 2010”

**Birmingham (UK), May 25<sup>th</sup> – 27<sup>th</sup>, spotlights on cutting edge machines showcased in a stand of 160 square meters (Hall 5 - Stand 5810)**

**Marchesini Group**, a worldwide leader in the industry of automatic machines for packaging pharmaceuticals and cosmetics, will be at “**Total 2010**” (**Birmingham, UK**) from **May 25<sup>th</sup> – 27<sup>th</sup> (Hall 5 - Stand 5810)**. The stand of **160 square meters** will host cutting edge machines that meet all the packaging requirements of pharmaceuticals and cosmetics of various types.

Spotlights will be on **Integra300**, the **integrated robotic blister line** that integrates the two thermoforming and carton packaging operations in just one monobloc unit. The line is connected to an integrated robotic system, **Robocombi**, which picks up each individual blister and places it directly in the buckets of the cartoner, without any intermediate phase.

The vertical **intermittent motion cartoning machine model MAV50, with dynamic infeed table** for packaging cosmetic jars will also be on show. The machine meets market and product requirements in terms of efficiency, flexibility and reliability of the packaging process thanks to the constructional solutions exploited, which bear in mind not only ergonomics, to make the work of operators much easier, but also the treatment and integrity of the carton.

To prove the Group’s efforts towards the **topic of pharmaceutical serialization**, there will also be the labelling machine produced by Neri, **BL400VTEXL Track&Trace**, which applies and controls Track & Trace codes on pharmaceuticals and labels with various code combinations.
