New investments for Marchesini Group: the first brick has been laid for the extension of the factory dedicated to the Group's logistic activities

By Autumn 2010, **Marchesini Group** will inaugurate the extension of the factory dedicated to the Group's logistic activities.

Work has indeed commenced to extend the building in Pianoro, Bologna, next to the Headquarters, dedicated to all the logistic activities of Marchesini Group.

The investment worth approximately € 6.500.000 will give life to a modern and comfortable factory, designed by Architect Stefano Visinelli. The building will cover an area of **three and a half thousand square meters**. The investment is part of the overall project that Marchesini Group has been pursuing for a number of years with the aim to concentrate all the Group's logistic activities in an effective and strategic manner.

The new building has been designed according to cutting edge criteria of eco compatibility and sustainability and will have a geothermal system designed by Airklima, which will ensure a comfortable workplace, warm in winter and cool in summer, exploiting an environment friendly technology.

The laying of the first brick (*see picture*) was attended by **Rita Tunioli**, Logistics and Purchasing Director of Marchesini Group and **Marco Marchesini**, Management and Production Director of Marchesini Group. “*This extension –Marco Marchesini commented – will enable us to manage all the Group's logistic activities in an increasingly efficient manner; what's more, considering its characteristics, this project represents a way of doing business always bearing in mind increasingly environment friendly developments in which Marchesini Group believes and invests.*”
