

Press Release

The Marchesini Group at Fachpack 2019

Viersen (Germany) – The Marchesini Group will be at **Fachpack (Hall 3A - Pad. 226)**, one of the leading European trade fairs for packaging, technology, processing and logistics. It will take place from 24th to 26th September at the Exhibition Centre Nuremberg. This participation, just like that of **Interpack** in 2017 and **Achema** in 2018, confirms how important the German market is for Marchesini, which has been managed since 1984 by its branch office in **Viersen**, northern Germany.

At the tradeshow in Nuremberg the Group arrives just back from the presentation of its **AI - Artificial Intelligence** event held last April, in which its Industry 4.0. program was presented to an audience of **600 customers from all over the world**. Fachpack presents itself as an excellent opportunity to present the Group's AI program for the first time on the German market.

Marchesini's galaxy will present also two new stars at the trade fair:

Axomatic, a gem of the "**Made in Italy**" packaging industry and manufacturing specialist of cosmetic packaging machinery, and **V2engineering**, a specialised cartoning machine producer.

Axomatic (Hall 3 - Stand 629) will be exhibiting a tube-filler, series *Axo 1000*, for filling and sealing plastic, laminate or aluminium tubes, which can process 80 pieces per minute.

Axo 1000 will be connected to a 10-litre vacuum mixer, series *Axomix*, which is designed and built to produce emulsion, cream, milk, gel and balm products as well as toothpaste and much more.

V2engineering (**Hall 3 - Stand 633**) will be showcasing a horizontal cartoner, model *V106N*, which is capable of processing 100 cartons per minute, plus a cellophane wrapper, *V122*, made to wrap small and medium sized products. The compact layout and ergonomic constructional design with balcony structure make these machines extremely flexible and perfect for the cosmetic, pharmaceutical and food industries.

Both V2engineering and Axomatic have been taken over by Marchesini with a majority share without altering its productive processes and reference partners. On one hand, they will continue to manage their customers, projects and products independently, according to their consolidated in-house dynamics. On the other, in view of its majority shareholding, Marchesini will supervise the organisation and commercial activities of Axomatic and V2engineering, which will however maintain their well-tested corporate set-up to **rapidly, straightforwardly and flexibly** meet the typical requirements of cosmetic customers.
